12v 30Amp DC Motor Control Drive and Battery Charger

Key Features:-

30A (360 Watt) Capacity
Over-current trip 'weight limit' setting
Fail-Safe operation
Brake Control
Battery Charger
Soft Start & 'nudge'
Adjustable Speed
Battery Meter

Designed for use in the lifting and handling industry; in particular a fork-lift handcart for manoeuvring pallets in a warehouse. It has Soft Start and 'slow nudge' features.

The current limit provides a means to prevent the rig being over-laden – a significant safety feature.

The board has all safety limit features required plus built in circuitry to prevent damage due to misuse such as reverse battery polarity.

The board has a built in battery charger to maintain the 12v battery at its optimum operating condition.

All features have been thoroughly life tested under full load conditions.

The only external components required are:-

12v motor gearbox
Brake (optional)
Charger Transformer
12v Battery & Fuse
Switches, Up/Down, Limits and Estop.

DC Drives can easily alter the specification to suit your requirements.
Other applications include, Stairlifts, Wheelchair drive, lorry tailgate lift, powered cranes.

The price is around £90.00 depending on quantity.
